#### Summary

Businesses downgraded their expectations of the output of Ukrainian goods and services on the back of a tighter quarantine. Respondents expect higher inflation and stronger depreciation of the domestic currency. Companies reported a decline in their performance.

#### Respondents expect that over the next 12 months:

- the output of goods and services will shrink, the balance of responses being (-24.4%), down from (-16.1%) in Q3 2020
- business activity will decline the business outlook index ("BOI") was 99.6%, down from 100.8% in the previous quarter. Respondents' expectations of a decline in economic activity resulted from their lower expectations for total sales, investment in machinery, equipment and tools, and their financial and economic standings.
- the inflation rate will rise consumer prices are expected to be up by 7.9% (7.0% in Q3)
- the hryvnia will depreciate further the UAH/USD exchange rate will be on average UAH 29.68 per USD 1 (compared to UAH 28.99 per USD 1 in Q3).

Respondents reported lower expectations of borrowing needs in the near future. The percentage of respondents who plan to take out loans remains large. Most respondents prefer hryvnia loans. There was a decrease in the difference between the percentages of respondents reporting tighter lending conditions, and those reporting eased lending conditions.

The main impediments to improved company performance are insufficient demand and high raw material and supplies prices.

#### **Main Terms and Definitions**

- A **balance of expectations** is the difference between the percentages of respondents' replies "grew/improved/good" and "decreased/worsened/bad".
- The business outlook index (BOI) is an aggregate indicator that shows expectations of company development over the next 12 months. It is calculated as the arithmetic mean of the balances of responses regarding financial and economic standings, total sales of own products, investment spending on construction, investment spending on machinery, equipment and tools, and staff numbers. An index above 100 means that positive economic sentiment prevails in society, while an index below 100 indicates the prevalence of negative economic sentiment.
- A quartile is the value of the BOI where an ordered sample is divided into four equal-sized subgroups.
- A median is the value of the BOI in the middle of an ordered sampled where the sample is divided into two equal-sized subgroups.
- Short names for the main economic activities (according to the 2010 Classification of Main Economic Activities (КВЕД – 2010)) that are used in the survey:

Full name	Short name
agriculture, forestry and fishing	agriculture
mining and quarrying	mining
