This coin celebrates the Ukrainian RK-360MC Neptune coastal missile system, which was a significant breakthrough for the domestic defense industry in the development and production of modern weapons. It not only defeated one of the largest ships of the Russian Navy in the first months of the full-scale invasion, but also wrote itself into the history of Ukrainian defense forever. The sinking of the ship, the Moskva missile cruiser, is yet another proof that Ukrainian “cotton” will always be accurate. (“Cotton” or “bavovna” in Ukrainian, is a word used informally or jokingly in Ukraine to refer to explosions caused by Ukrainian weapons strikes on Russian targets. It came into use due to the similarity between Russian word, *khlopok*, meaning “a small bang,” and *khlopok*, meaning “cotton.” Though pronounced differently in Russian, the two words are spelled the same, and “*khlopok*” is frequently mistranslated by automatic translation systems into “bavovna” in Ukrainian.)

Obverse: there is a stylized image of the Moskva missile cruiser with a hole in the hull, sunk thanks to the skill of Ukrainian military by R-360 Neptune anti-ship

missiles. The “invulnerable” flagship of the Russian Black Sea Fleet is stylized as a children’s paper ship. This especially contrasts with the myth of the ship’s power based on its size and weapons. The ship’s deckhouse depicts the outline of the Kremlin tower with the broken teeth of the Kremlin wall, symbolizing the collapse of Russia’s imperial ambitions. Above, to the left, against a smooth background are the coin’s face value 5 and the graphic symbol of the hryvnia ₴; there are also the coin’s issue year (placed vertically), Ukraine’s small coat of arms, and the vertical legend УКРАЇНА (Ukraine); beneath, to the left, is the mint mark of the NBU’s Banknote Printing and Minting Works.

Reverse: There is a Neptune coastal mobile missile system at the moment of missile launch. This system is in service with the Ukrainian Navy, as indicated by the emblem in the upper left. Against a smooth background is the stylized trident of Neptune, the god of the seas, symbolizing the indomitable Ukrainian spirit that deftly pierces enemy targets. Above, to the right, is the legend NEPTUNE, which runs parallel with the missile.

This coin celebrates a rare bird that has become a symbol of the revival of life in the Chornobyl zone – the black stork.

The 30-kilometer exclusion zone and the zone of mandatory resettlement, which was designated the Chornobyl Radiation and Ecological Biosphere Reserve on 26 April 2016, is now a special kind of breeding reserve not only for common species of animals and plants, but also for endangered ones, including the black stork. Thanks to environmental protection in the Chornobyl zone, the number of the birds is growing. This indicates the restoration of the region's ecosystem, and that the reserve is becoming a center of biodiversity even in the face of radiation contamination.

Obverse: above is Ukraine's small coat of arms, under which is the legend УКРАЇНА (Ukraine); to the right of the coat of arms is the coin's face value 5 / ГРИВЕНЬ (5 / hryvnias); in the center is a symbolic wheel of life

that marks the rebirth of nature: a stylized international radioactive sign shrouded in leaves and surrounded by animals that are increasing their populations in the 30-kilometer exclusion zone, which has become a kind of breeding reserve for black storks, Przewalski's horses, lynxes, bison, moose, and brown bears; there is a circular legend against a smooth background, reading: ЧОРНОБІЛЬСЬКИЙ РАДІАЦІЙНО-ЕКОЛОГІЧНИЙ БІОСФЕРНИЙ ЗАПОВІДНИК (Chornobyl Radiation and Ecological Biosphere Reserve) (to the left) CHORNOBYL RADIATION AND ECOLOGICAL BIOSPHERE RESERVE; below is the coin's issue year – 2024; above is the mint mark of the NBU's Banknote Printing and Minting Works.

Reverse: against an outline of a landscape scene is a black stork (pad printed). Above, to the left is a legend against a smooth background: ЛЕЛЕКА / ЧОРНИЙ (black stork) / CICONIA NIGRA; above are black stork chicks in a nest.

This coin celebrates the unity of Ukraine and Europe, and our shared values and aspirations for a peaceful and prosperous future. The celebration of Europe Day in Ukraine indicates not only geographical proximity, but also the spiritual kinship, historical heritage and solidarity that unite Ukraine with the European family.

Obverse: in the center is the stylized trident, a symbol of Ukraine. To the left of the trident are the EU's official motto ЄДНІСТЬ У РІЗНОМАНІТТІ (United in diversity) (semicircular, above), and the vertical legend УКРАЇНА (Ukraine) (next to the trident). Beneath are the coin's face value 5, the graphic symbol of the hryvnia ₴, the coin's issue year – 2024 (placed vertically), and Ukraine's small coat of arms. To the right of the

trident is a floral ornament that stands for the country's prosperity and distinctive culture. There is also the mint mark of the NBU's Banknote Printing and Minting Works.

Reverse: against a smooth background, are the abbreviations EU and UA, which intertwine, creating a visual symbol of the unity of Ukraine and Europe. The two letters "U" seem to be one, forming the image of a new life that sprouts under the auspices of the European Union. The legends ДЕНЬ / ЄВРОПИ / EUROPE / DAY are surrounded by 12 stars that resemble those on the EU flag, symbolizing the unity, integrity and harmony of the peoples of Europe.

These coins celebrate a unique ornament that is an integral part of the national identity of the Crimean Tatars. The Ornek is a living heritage that has been preserving its unique beauty and deep meaning for centuries and serving as a source of inspiration for artists. Each embroidered or painted pattern is a kind of message that crosses time and space, connects the past with the present, and passes on the people's heritage to future generations. In 2021, the Ornek was officially included in the UNESCO Representative List of the Intangible Cultural Heritage of Humanity.

Obverse of the silver coin: in the center of the composition is a Crimean Tatar embroiderer (nağışçı), a charming craftswoman leaning over an embroidery machine (kergef). Her hands, masterfully handling the needle, breathe life into the canvas, creating exquisite Ornek patterns on it. The ornament sprouts in different directions from the craftswoman, symbolizing the continuity of the tradition and its unceasing continuation by talented descendants. Above is the semicircular legend УКРАЇНА (Ukraine), below which are the legends ÖRNEK / ОРБНЕК; in the center between the legends is Ukraine's small coat of arms; to the right of

the craftswoman are the coin's face value 10, the graphic symbol of the hryvnia ₴, and the coin's issue year – 2024.

Obverse of the nickel silver coin: the general stylized composition is that of the obverse of the silver coin: a Crimean Tatar embroiderer leaning over an embroidery machine; above is the semicircular legend УКРАЇНА (Ukraine), below which are the legends ÖRNEK / ОРБНЕК; in the center between the legends is Ukraine's small coat of arms; to the right of the craftswoman are the coin's face value 5, the graphic symbol of the hryvnia ₴, and the coin's issue year – 2024; beneath, to the right of the embroidery machine is the mint mark of the NBU's Banknote Printing and Minting Works.

Reverse: against a smooth background is an Ornek ornament in relief, which stands for familial values. In the center of the ornament are interconnected elements that reflect the deep symbolism of family ties. This family consists of the signs of a man, a woman, and their common home. On both sides of the central vertical are symbols representing children. Together they create a full-fledged ornament that reflects family unity and harmony.

These coins celebrate a noble act – blood donation, which demonstrates the highest humanity of helping others. This coin is a tribute to blood donors, whose invaluable contributions save lives and keep the nation healthy. It symbolizes unity, especially in difficult times, when one dose of blood can be a life-saver for several people at once.

Obverse of the silver coin: there is a composition, in the center of which is a three-dimensional drop of blood surrounded by schematic figures of people shaking hands. This image is a testament to the noble common goal of saving lives. From each figure, to the center of the circle, stylized drops of blood move, symbolizing the personal contribution to blood donation by each person who cares. Above, in the center is Ukraine's small coat of arms; the legend УКРАЇНА (Ukraine) is under the composition; beneath, to the right of the figures are the coin's face value 10 and the graphic symbol of the hryvnia ₴; beneath, to the left is the coin's issue year 20/24.

Obverse of the nickel silver coin: the general stylized composition is that of the obverse of the silver coin:

an image of a drop of blood surrounded by schematic human figures; above, in the center is Ukraine's small coat of arms; under the composition is the legend УКРАЇНА (Ukraine); beneath, to the right are the coin's face value 5 and the graphic symbol of the hryvnia ₴; beneath, to the left of the figures is the coin's issue year 20/24; to the right, between the figures is the mint mark of the NBU's Banknote Printing and Minting Works.

Reverse: against a smooth background, to the right, is the legend ЖИТТЯ (life), which is stylized as a blood transfusion system with a needle. This element symbolizes the process of supplying blood to the vessels shown at the bottom left. Vessels that are already filled with blood are marked in red, and those that still need blood are marked in blue. The stylized drop and the legend життя (life) harmoniously combine to form the name of the coin – "A Drop of Life." The texture of the matte background on which all these elements are placed symbolizes the great need for blood donations in times of war.

This coin celebrates Olena Pchilka, one of the most prominent figures in Ukrainian history and culture. Olha Petrivna Kosach (her real name) was a legendary poet, translator, scholar, folklorist, ethnographer, publisher, and an active public figure. Her life was full of tireless work for the benefit of the Ukrainian people: from collecting the treasures of Ukrainian folklore and raising a brilliant generation to fighting for the right of Ukrainians to speak and write in their native language. Pchilka's creative heritage is still relevant today, and her name is a symbol of a Ukrainian woman who combines high intellectual culture, patriotism, and boundless love for Ukraine.

Obverse: there is a stylized composition symbolizing Pchilka's pedagogical and educational activities. In the center of the composition are six flower pots stylized as elements of the Hadiach ornament. This is not just a detail, but a symbol of the writer's six children, who were brought up in the spirit of Ukrainian traditions. The pot arrangement resembles the battlement of a castle wall, emphasizing the unshakable "fortress

of Ukrainian identity" that has resisted hostile influences for centuries. To the right, between the stylized pots is the mint mark of the NBU's Banknote Printing and Minting Works; the bottom of the coin features the legend УКРАЇНА (Ukraine), the coin's face value 2, the graphic symbol of the hryvnia ₴, Ukraine's small coat of arms, and the coin's issue year 20 / 24.

Reverse: against a smooth background is a stylized portrait of Olena Pchilka. The image of the woman against the background, the outline of which resembles a crown, impresses with its deep, wise and determined gaze. It seems to pierce through time, reminding us of the eternal significance of Pchilka's works. To the left and right of the portrait are the legends ОЛЕНА ПЧИЛКА (Olena Pchilka) and ОЛЬГА КОСАЧ (Olha Kosach), and below in a semicircle is the legend КОРОЛЕВА-МАТИ (Queen Mother), as Lesia Ukrainka lovingly called her mother. The years of the poet's birth and death 1849 / 1930 complete the composition of the reverse.

Since then, it has demonstrated impressive effectiveness in combat conditions, becoming an indispensable tool for aerial reconnaissance and artillery fire adjustment.

Obverse: there is a stylized image from the flight control monitor of the Leleka-100 drone, which shows detected enemy targets – tanks – on steppeland roads. In the center is the outline of the drone, which embodies technological progress and Ukraine's innovative potential. Beneath, to the left, against a smooth

The stylized vertical and horizontal scales symbolize the drone's ability to determine target coordinates and adjust artillery fire. Beneath, to the left, parallel to the drone, is the legend ЛЕЛЕКА-100 (Leleka-100).

These coins celebrate the unique technique of Pliontanism, which was invented by the genius contemporary artist Ivan Marchuk. His signature style, similar to lace made of the finest strokes, gives the paintings three-dimensionality, creating dynamic light effects through a play of shades. These commemorative coins pay tribute to the outstanding artist, whose talent and innovative approach to painting have been recognized worldwide. The coins embody the inexhaustible creative power and depth of the Ukrainian soul, which live in every intricacy of lines on the artist's canvases.

This coin celebrates the system of political organization of the state, an important component of the democratic organization of any country, which is founded on the principles of popular representation, the separation of powers and the rule of law. This coin celebrates the centenary of the birth of one of the most recognizable directors of the twentieth century, who went down in the history of cinema as a representative of the school of Ukrainian poetic cinema. “Shadows of Forgotten Ancestors” and “The Color of Pomegranates” are masterpieces that brought Parajanov worldwide recognition and numerous international awards. This coin is a symbol of Parajanov’s defiance, creative freedom, and eternal search for truth, a filmmaker whose heritage lives on in every shot and in every scene...

Obverse: against a smooth background is a stylized image of a pomegranate in section and of pomegranate

seeds. This image is an allusion to the master’s naked soul, in which there was a place for Ukraine, where he lived and worked for some time. Above the composition are the legend УКРАЇНА (Ukraine), the coin’s face value 5, the graphic symbol of the hryvnia ₴, and the coin’s issue year – 2024. In the center of the pomegranate is Ukraine’s small coat of arms.

Reverse: there is a stylized portrait of Parajanov and a masterfully created collage consisting of fragments of scenes from the filmmaker’s works. This collage stands for the master’s world and his life path. Above the composition is the legend СЕРГІЙ ПАРАДЖАНОВ / 100 (Sergei Parajanov / 100).

This coin celebrates the outstanding achievements of Ukrainian athletes who have made Ukraine famous on the world stage – from the first legendary records to the triumphant victory of boxer Oleksandr Usyk, who became the undisputed world heavyweight champion in May 2024. By holding simultaneously four of the most prestigious belts in boxing, he demonstrated to the world the indomitable spirit, fortitude and the limitless possibilities of Ukrainians. This coin honors the feats of Ukrainian athletes and reminds us that even in the most difficult times Ukrainians are capable of great victories.

Obverse: against a smooth background is a traditional Crimean Tatar ornament that stands for the Crimean descent of Oleksandr Usyk. This pattern, which was carefully selected and used by Ukrainian designer Elvira Hasanova as one of the athlete's images in the

face-off before his fight for the title of undisputed world champion, emphasizes the inextricable connection between Crimea and Ukraine. Above, to the right of the ornament are the coin's issue year – 2024 and Ukraine's small coat of arms. Beneath, to the right are the legend УКРАЇНА (Ukraine), the coin's face value 5, the graphic symbol of the hryvnia ₴, and the mint mark of the NBU's Banknote Printing and Minting Works.

Over the last century, it has gained the trust of generations of listeners and has become a public institution that informs, entertains, educates and consolidates citizens both inside and outside the country.

Obverse: In the center of the composition is Ukraine's small coat of arms, framed with semicircles of the repeated phrase ГОВОРІТЬ КИЇВ (Kyiv speaking) on the right, emphasizing the historical and contemporary role of Kyiv as a communications center. This element also depicts a stylized fragment of the contact line and the propagation of radio waves over

the occupied territories, symbolizing the importance of Radio Ukraine in defending national identity and countering enemy propaganda. Above is the legend УКРАЇНА (Ukraine), to the left of which are the coin's face value 5 and the graphic symbol of the hryvnia ₴ (placed horizontally) and the coin's issue year – 2024 (placed vertically); under this composition is the mint mark of the NBU's Banknote Printing and Minting Works.

These coins celebrate Kharakternyk Cossacks – the legendary warriors of the Zaporozhian Sich. These warriors, shrouded in mystical fame, were distinguished by their unsurpassed skill in combat and mastery of weapons, which aroused fear among their enemies and admiration among their allies. The historian Dmytro Yavornytskyi described them as knights whom “neither fire nor water, nor saber, nor an ordinary bullet, save for a silver one, could fell.” Today, Ukrainian defenders, like their ancestors, are demonstrating exceptional bravery, resilience and loyalty to their homeland, continuing the glorious traditions of the Cossacks.

Obverse of the silver coin: in the center of a composition is a stylized image of a soldier who is carefully holding and protecting the small coat of arms of Ukraine – a symbol of freedom and independence. The composition symbolizes the eternal desire of the Ukrainian people to live in their own sovereign state. Against a matte background are enemy bullets bouncing off the soldier, failing to hit the “Ukrainian soul.” Under

the coat of arms are the coin’s face value 10, the graphic symbol of the hryvnia ₴, and the coin’s issue year – 2024.

The obverse of the nickel silver coin repeats the general stylized composition of the obverse of the silver coin: a soldier is protecting the small coat of arms of Ukraine against the backdrop of bullets that are bouncing off him. Under the coat of arms are the legend УКРАЇНА (Ukraine), the coin’s face value 5, the graphic symbol of the hryvnia ₴, and the coin’s issue year – 2024. To the left of the soldier is the mint mark of the NBU’s Banknote Printing and Minting Works.

Reverse: Against a smooth background is a stylized image of a Kharakternyk Cossack who is protecting a bird – a symbol of freedom that has been made to look like a trident. The composition reflects the connection between the ongoing war in Ukraine and the Ukrainian spirit of the Cossack era. Against a matte background are broken enemy sabers that are powerless in the face of undying love for one’s native land and the desire for freedom.

* The edge of the coin is smooth with incised inscriptions indicating the metal and its fineness Ag 925, fine weight 31.1, the legend УКРАЇНА (Ukraine), and the mint mark of the NBU’s Banknote Printing and Minting Works.

This commemorative coin celebrates the Archangel Michael, one of the main archangels, who is known as the Commander of the Heavenly Host (commander-in-chief in Greek). The Archangel Michael is one of the most revered biblical characters among believers. He leads “the heavenly army of angels,” and is the patron of soldiers who fight for just causes. Respect for the Archangel Michael has been maintained since the days of Kyiv Rus to the present day. He was a symbol of the heavenly protection of Kyiv Rus princes. Later on, this reverence was manifested not only in toponyms – in the names of church buildings, but also in heraldry – on the coats of arms of Kyiv, the Voivodeship of Kyiv, and the Province of Kyiv. Today, the image of the Archangel Michael is present in the badges of Ukrainian troops and continues to symbolize the fight against evil.

Obverse: above is Ukraine’s small coat of arms, below which is the legend УКРАЇНА (Ukraine); in a circle, against the background of the MM-14 pattern (the 2014

camouflage pattern, also known by its unofficial names Pixel and Ukrainian Pixel), is a stylized wreath made of laurel leaves, which stands for glory and victory; at the bottom of the coin are its face value 10 and the graphic symbol of the hryvnia ₴; in the center, in an octagonal cartouche, against a smooth background, is the NBU logotype, below which is the following legend: НАЦІОНАЛЬНИЙ/ БАНК УКРАЇНИ/2024 (National/Bank of Ukraine/2024).

Reverse: against a smooth backdrop, is an image of the Archangel Michael, to the right and left of whom are stylized silhouettes of Ukrainian soldiers, helicopters and anti-tank hedgehogs, symbolizing Ukraine’s struggle for independence; there is a circular legend, reading: ... ЗА НАС І ДУШІ ПРАВЕДНИХ, І СИЛА АРХІСТРАТИГА МИХАІЛА (...the souls of the righteous and the power of the Archangel Michael are with us) (from the Haidamaky poem by Taras Shevchenko); the lines are written in ChebanykSansN.2017 © VasylChebanyk script.

* The edge of the coin is smooth with incised inscriptions indicating the metal and its fineness Ag 999, fine weight 31.1, and the mint mark of the NBU’s Banknote Printing and Minting Works.

This medal celebrates the 10th anniversary of the adoption of the Law of Ukraine On the National Anti-Corruption Bureau of Ukraine. The NABU is a central executive body with a special status. It was created to prevent, detect, stop, investigate and solve corruption cases that pose a threat to national security. Since its inception, this institution has uncovered numerous cases of bribery, embezzlement of state property and illicit enrichment among high-ranking officials. This medal symbolizes the NABU's achievements in its fight against grand corruption, as well as the contribution of this law enforcement agency to shaping the future of Ukraine as part of the European community.

Obverse: in the center, against a smooth background, is the logotype of the National Anti-Corruption Bureau of Ukraine, above which are Ukraine's small coat of arms and the legend УКРАЇНА (Ukraine); beneath are the medal's issue year – 2024

and the mint mark of the NBU's Banknote Printing and Minting Works.

Reverse: in the center is a stylized image of a sunflower blooming under the sun, the shape of which recalls the logotype of the institution. The unlit and wilted petals the barren and dry land act as an allegory of the harmful effects of darkness and drought on the development of sunflowers, just as corruption negatively affects the development of the state and society. It is the "fight of light against darkness (corruption)" that allows sunflowers to flourish and states to develop and prosper. The overall composition of the reverse forms a stylized prohibition sign; there is also the circular legend – the NABU's slogan – ЗНЕШКОДИТИ і ЗАПОБІГТИ (Eradicate and Prevent). Above is the year of the NABU's founding and start of operations – 2014; beneath is the legend 10 / РОКІВ / ЗАКОНУ ПРО НАБУ (10 / years / of the NABU Law).
