

Business Outlook Survey of Odesa Oblast*

Q2 2025

A survey of companies carried out in **Odesa oblast** in Q2 2025 showed that, on the back of the war, qualified staff shortages, high raw material and supplies prices, and weak demand, respondents <u>reported weak expectations for the output of Ukrainian goods and services</u>. They also reported guarded expectations for the performance of their companies over the next 12 months. Prices were expected to rise further. Depreciation expectations weakened, but still remained strong.

Company managers said they expected that over the next 12 months:

- the output of Ukrainian goods and services would decrease: the balance of expectations was (-10.8%), compared to (-13.9%) in Q1 2025 (Figure 1) and 9.2% across Ukraine. Respondents from trading companies reported the dimmest expectations (-57.1%). Meanwhile, the firmest expectations were reported by manufacturing companies (33.3%)
- prices for consumer goods and services would rise: 51.4% of respondents said that price growth would exceed 10.0%, compared to 56.8% in the previous quarter and 58.4% across Ukraine. Respondents continued to refer to military actions and their consequences, production costs and the hryvnia exchange rate as the main inflation drivers (Figure 2)
- the hryvnia would depreciate at a slower pace: 81.1% of respondents (compared to 91.9% in the previous quarter) expected the hryvnia to weaken against the US dollar, the figure across Ukraine being 83.4%
- the financial and economic standings of their companies would remained unchanged: the balance of expectations was 0.0%, compared to (-2.7%) in the previous quarter and 2.4% across Ukraine (see Table). The gloomiest expectations were reported by respondents from trading companies (the balance of responses was (-42.9%)), while the most optimistic expectations were reported by transport and communications companies (20.0%)
- <u>total sales would decrease</u>: the balance of responses was (-2.7%), compared to 2.7% in the previous quarter. Meanwhile, external sales were expected to rise: the balance of responses was 18.8%, as in the previous quarter (see Table). Across Ukraine, the balances of responses were 10.5% and 9.4% respectively
- investment in machinery, equipment, and tools would increase: the balance of responses was 13.5%, compared to 11.1% in Q1 2025. Respondents expected that investment in construction would remain unchanged: the balance of responses was 0.0%, down from 13.5% in Q1 2025 (see Table). Across Ukraine, the balances of responses were (-0.7%) and 7.8% respectively
- staff numbers would decrease at a slower pace: the balance of responses was (-13.5%), compared to (-27.0%) in Q1 2025. Overall, across Ukraine, the balance of responses was (-4.4%) (Figure 4)
- purchase and selling prices would rise: the balances of responses were 94.4% and 56.8% respectively (compared to 97.3% and 54.1% respectively in Q1 2025) (Figure 6). Respondents from companies engaged in other economic activities reported the firmest intentions to raise their selling prices (66.7%). Respondents said that energy prices, raw material and supplies prices and wage costs were the main selling price drivers (Figure 7)
- <u>per-unit production costs and wage costs per staff member would grow more slowly</u>: the balances of responses were 40.5% and 35.1% respectively, compared to 55.6% and 45.9% in Q1 2025 (Figures 4 and 6).

Companies named military actions and their consequences, qualified staff shortages, high raw material and supplies prices, and weak demand (the impact of this factor was reported to have increased compared to the previous quarter) as the main drags on their ability to boost production (Figure 5).

Respondents expected that their borrowing needs would increase in the near future (Figure 8). The respondents who planned to take out bank loans (32.4% of those surveyed) opted only for domestic currency loans. Respondents said that lending conditions had remained tight (Figure 9). Respondents referred to the availability of other funding sources, high interest rates and complicated paperwork as the main factors deterring them from taking out loans (Figure 10).

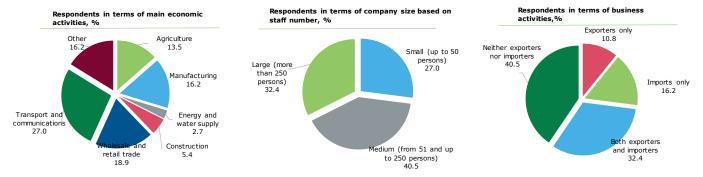

97.3% of the respondents in the oblast said that they had encountered no difficulties in effecting transactions with funds deposited in bank accounts (96.2% across Ukraine).

Assessments of financial and economic standings as of the time of the survey (Figure 3)

- <u>Companies assessed their current financial and economic standings as bad</u>: the balance of responses was (-8.1%), compared to (-5.4%) in Q1 2025 and (-5.3%) across Ukraine.
- <u>Finished goods stocks were assessed at below their normal levels</u>: the balance of responses was (-33.3%), compared to (-21.4%) in Q1 2025.
- Companies had a sufficient amount of unutilized production capacity to meet any unexpected rise in demand: the balance of responses was 25.0%, compared to 5.6% in Q1 2025.

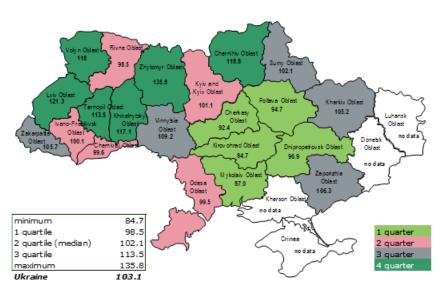

Survey Details^{1,2}

- Period: 30 April through 27 May 2025.
- A total of 37 companies were polled.
- A representative sample was generated on the basis of the following economic activities: agriculture, manufacturing, trade, transport and communications, and other economic activities.

Business Outlook Index for Next 12 Months in Terms of Oblasts³, %

^{*}a quartile is the value of the BOI where an ordered sample is divided into four equal-sized subgroups

Table. The Business Outlook Index of Companies in Odesa Oblast and Its Components

Expectations over next 12 months for	Balances of responses, %				
	Q2 24	Q3 24	Q4 24	Q1 25	Q2 25
Financial and economic standings	0.0	-13.9	-2.7	-2.7	0.0
Total sales	0.0	-13.5	-8.1	2.7	-2.7
Investment in construction	-5.4	13.5	-8.6	2.9	0.0
Investment in machinery, equipment, and tools	-2.6	10.8	-5.9	11.1	13.5
Staff numbers	-31.6	-27.0	-19.4	-27.0	-13.5

¹ This sample was generated in proportion to the contribution of each region and each economic activity to Ukraine's gross value added.

[&]quot;a median is the value of the BOI in the middle of an ordered sample where the sample is divided into two equal-sized subgroups

² Data for totals and components may be subject to rounding effects.

³ The business outlook index (BOI) is an aggregate indicator for expected business performance over the next 12 months. It is calculated using the balances of respondents' responses regarding changes in the financial and economic standings of their companies and future economic activity.
