## Let's hold the line!

Today, as never before, the strength of the Ukrainian people is apparent – in each and every one of them who defends, works for, strengthens the country, and helps fight for the truth and freedom of their fellow Ukrainians.

"Let's hold the line!" is the common call! With or without weapons, day or night, in the most difficult and fiercest moments, our defenders and all of us together hold the front, hold our freedom.

Since the beginning of the full-scale invasion, the Ukrainian people and servicepersons have demonstrated amazing resilience and courage. Our heroes have not only resolutely repelled the enemy – they have also achieved significant military achievements that have already gone down in world history.

The destruction of the largest number of Russian artillery pieces in March 2024 (976 systems), the first downing of an A 50U long-range radar detection aircraft in January 2024, the sinking of the Askold missile ship in November 2023 before it was commissioned, the destruction of attack and

of Ukraine

multi-purpose helicopters, large amphibious assault ships, patrol ships and submarines, changes in combat tactics, bolstering the country's defense capability, the introduction of innovations and the development of military infrastructure – these are only some of the Ukrainian military's achievements.

Ukraine has shown, and every day continues to show the world its resilience by courageously fighting for freedom and independence. During the full-scale invasion, it not only withstood unprecedented pressure, but also preserved its statehood, national identity, culture and language, in particular thanks to the millions of people who work, donate and support Ukraine every day behind the lines.

The resilience of one is the resilience of millions!  
Let's hold the line!
